

Julia Lee Performing Arts Academy
COVID-19 Prevention Plan
2020-2021

# **COVID-19 Prevention Program (CPP) for**

# **Julia Lee Performing Arts Academy**

This CPP is designed to control exposures to the SARS-CoV-2 virus that may occur in our workplace.

Date: 01/20/2021

### **Authority and Responsibility**

**Tanya Taylor** has overall authority and responsibility for implementing the provisions of this CPP in our workplace. In addition, all managers and supervisors are responsible for implementing and maintaining the CPP in their assigned work areas and for ensuring employees receive answers to questions about the program in a language they understand. As things continue to rapidly change, this plan may change based on new guidelines that come forward.

All employees are responsible for using safe work practices, following all directives, policies and procedures, and assisting in maintaining a safe work environment.

#### Identification and Evaluation of COVID-19 Hazards

We will implement the following in our workplace:

- Conduct workplace-specific evaluations using the Appendix A: Identification of COVID-19
   Hazards form.
  - Evaluate employees' potential workplace exposures to all persons at, or who may enter, our workplace.
- Review applicable orders and general and industry-specific guidance from the State of California, Cal/OSHA, and the local health department related to COVID-19 hazards and prevention.
- Evaluate existing COVID-19 prevention controls in our workplace and the need for different or additional controls.
- Conduct periodic inspections using the **Appendix B: COVID-19 Inspections form** as needed to identify unhealthy conditions, work practices, and work procedures related to COVID-19 and to ensure compliance with our COVID-19 policies and procedures.

### **Employee participation**

Employees and their authorized employees' representatives are encouraged to participate in the identification and evaluation of COVID-19 hazards by: All staff will go through a training on understanding the COVID-19 hazard identification and evaluation. This training will be documented for all staff.

#### **Employee screening**

We screen our employees by: Each employee will be screened directly with a contactless thermometer and questioner daily. JLPAA will ensure face coverings are worn by the screener and the staff. As well as face coverings are to be worn at all times while on campus. Once JLPAA has reopened with hybrid or full day class, all staff will be required to participate in an ongoing asymptomatic testing. The first testing will begin at least one week before the school reopens.

#### **Correction of COVID-19 Hazards**

Unsafe or unhealthy work conditions, practices or procedures will be documented on the **Appendix B**: **COVID-19 Inspections** form, and corrected in a timely manner based on the severity of the hazards, as follows:

The severity of the hazard will be assessed, and correction time frames assigned, accordingly.

Individuals are identified as being responsible for timely correction. Follow-up measures will be taken to ensure timely correction.

#### Control of COVID-19 Hazards

#### **Physical Distancing**

Where possible, we ensure at least six feet of physical distancing at all times in our workplace by:

- Eliminating the need for workers to be in the workplace e.g., telework or other remote work arrangements.
- Reducing the number of persons in an area at one time, including visitors.
- Visual cues such as signs and floor markings to indicate where employees and others should be located or their direction and path of travel.

- Staggered arrival, departure, work, and break times.
- Adjusted work processes or procedures, such as reducing production speed, to allow greater distance between employees.

Individuals will be kept as far apart as possible when there are situations where six feet of physical distancing cannot be achieved.

### Face Coverings

We provide clean, undamaged face coverings and ensure they are properly worn by employees over the nose and mouth when indoors, and when outdoors and less than six feet away from another person, including non-employees, and where required by orders from the California Department of Public Health (CDPH) or local health department.

The following are exceptions to the use of face coverings in our workplace:

- When an employee is alone in a room.
- While eating and drinking at the workplace, provided employees are at least six feet apart and outside air supply to the area, if indoors, has been maximized to the extent possible.
- Employees who cannot wear face coverings due to a medical or mental health condition or disability, or who are hearing-impaired or communicating with a hearing-impaired person. Alternatives will be considered on a case-by-case basis.

Any employee not wearing a face covering, face shield with a drape or other effective alternative, or respiratory protection, for any reason, shall be at least six feet apart from all other persons unless the unmasked employee is tested at least twice weekly for COVID-19.

#### **Engineering controls**

The ventilation system will be properly maintained and adjusted continuously

#### Cleaning and disinfecting

We implement the following cleaning and disinfection measures for frequently touched surfaces: [describe your workplace-specific measures, including:

- Cleaning supplies will continue to be purchased at an abundance so that JLPAA does run out of cleaning supplies. A cleaning/disinfection log is used daily to ensure proper cleaning is complete of all areas that are high traffic areas.
- Informing the employees and authorized employee representatives of the frequency and scope of cleaning and disinfection.
- · All high touch areas are cleaned and disinfected throughout the day to minimize hazard

Should we have a COVID-19 case in our workplace, we will implement the following procedures: In the event of a COVID-19 cleaning and disinfection will be done in areas, and the staff has been properly trained on how to clean/disinfect, using proper PPE equipment (gloves, mask, protectant glasses and cleaning solution). The following will also take place:

- · Close off areas used by the person who is sick.
- Open outside doors and windows and use fans or other engineering controls to increase air circulation in the area. Wait 24 hours before you clean or disinfect. If 24 hours is not feasible, wait as long as possible.
- Clean and disinfect the immediate workspace used by the person who is sick or diagnosed with COVID-19, such as the surfaces in their office or cubicle. If common areas such as bathrooms or shared items have already been routinely cleaned and disinfected, there is no need for additional action.

### Shared tools, equipment and personal protective equipment (PPE)

PPE must not be shared, e.g., gloves, goggles and face shields.

Items that employees come in regular physical contact with, such as phones, headsets, desks, keyboards, writing materials, instruments and tools must also not be shared, to the extent feasible. Where there must be sharing, the items will be disinfected between uses by staff that are trained on cleaning/disinfecting. Staff will be provided all materials.

#### Hand sanitizing

In order to implement effective hand sanitizing procedures, we:

- Continue to evaluate handwashing areas and keep the use of them spaced out.
- Determining the need for additional facilities.
- Encouraging and allowing time for employee handwashing.
- Providing employees with an effective hand sanitizer, and prohibit hand sanitizers that contain methanol (i.e. methyl alcohol).
- Encouraging employees to wash their hands for at least 20 seconds each time.]

### Personal protective equipment (PPE) used to control employees' exposure to COVID-19

We evaluate the need for PPE (such as gloves, goggles, and face shields) as required by CCR Title 8, section 3380, and provide such PPE as needed.

When it comes to respiratory protection, we evaluate the need in accordance with CCR Title 8 section 5144 when the physical distancing requirements are not feasible or maintained. [reference section 3205(c)(E) for details on required respirator and eye protection use.]

# **Investigating and Responding to COVID-19 Cases**

This will be accomplished by using the **Appendix C: Investigating COVID-19 Cases** form.

Employees who had potential COVID-19 exposure in our workplace will be:

- Notify the local County Health Department
- Isolate individual and exclude from school for 10-days from positive test date o Identify close contacts through contract tracing. Contact Tracing will be conducted by the Principal, with the support of staff and the Executive Director, who will remain in constant contact with the County Department of Public Health.
  - Quarantine and exclude exposed contacts (staff and students) for 14-days after the last date the individual was present at school.
    - If a teacher tests positive, it is likely that all students that had been in the classroom would have been in close contact and will need to be transitioned to 100% Distance Learning for 14 calendar days.
  - Any employee who is identified through contact tracing to have had a close contact will be immediately contacted, and asked to quarantine for 14 days.
  - Parents of students will be notified of the close contact, as will any other individual identified through contact tracing, following appropriate FERPA, HIPAA guidelines and state law. All identified individuals will be strongly encouraged to obtain a COVID-19 test, following California statutory guidelines.
  - Any employee that did not have close contact should monitor for symptoms according to the symptom checklist and may continue to work.

DRA

Staff will monitor students in their homeroom cohorts for symptoms, which will be reported immediately as the student is isolated.

Disinfection and cleaning of classroom and any spaces where infected individuals spent time.

- Communication to school's students, staff & parents to inform them of a positive COVID-19 test of a staff member following FERPA and HIPAA guidelines.
- The affected employees can return to work and resume other normal activities provided they meet each of these criteria:
  - 10 days have passed since the last positive test;
  - the individual has been fever-free for 48 hours without the aid of fever-reducing medication;
  - all COVID-19 related symptoms continue to improve; and,
  - the individual is released to return to work by a licensed physician per board policy.
- The information on benefits described in Training and Instruction, and Exclusion of COVID-19 Cases, below, will be provided to them.

# System for Communicating

Our goal is to ensure that we have effective two-way communication with our employees, in a form they can readily understand, and that it includes the following information:

- Who employees should report COVID-19 symptoms and possible hazards to, and how: All employees will report to the Office Manager, via phone or email.
- That employees can report symptoms and hazards without fear of reprisal.
- Our procedures or policies for accommodating employees with medical or other conditions that put them at increased risk of severe COVID-19 illness.

- Where testing is not required, how employees can access COVID-19 testing: In the event that a
  test is needed, the Office Manager will help the employee identify where they can have the testing
  completed, at no cost to the employee.
- In the event we are required to provide testing because of a workplace exposure or outbreak, we will communicate the plan for providing testing and inform affected employees of the reason for the testing and the possible consequences of a positive test.
- Information about COVID-19 hazards employees (including other employers and individuals in contact with our workplace) may be exposed to, what is being done to control those hazards, and our COVID-19 policies and procedures: All employees are required to follow and practice social distancing, where face coverings, wash hands every 20 minutes, gloves when needed, will help minimize hazards.

### **Training and Instruction**

We will provide effective training and instruction that includes:

- Our COVID-19 policies and procedures to protect employees from COVID-19 hazards.
- Information regarding COVID-19-related benefits to which the employee may be entitled under applicable federal, state, or local laws.
- The fact that:
  - o COVID-19 is an infectious disease that can be spread through the air.
  - o COVID-19 may be transmitted when a person touches a contaminated object and then touches their eyes, nose, or mouth.
  - An infectious person may have no symptoms.
- Methods of physical distancing of at least six feet and the importance of combining physical distancing with the wearing of face coverings.
  - The fact that particles containing the virus can travel more than six feet, especially indoors, so physical distancing must be combined with other controls, including face coverings and hand hygiene, to be effective.
    - The importance of frequent hand washing with soap and water for at least 20 seconds and using hand sanitizer when employees do not have immediate access to a sink or hand washing facility, and that hand sanitizer does not work if the hands are soiled.
- Proper use of face coverings and the fact that face coverings are not respiratory protective
  equipment face coverings are intended to primarily protect other individuals from the wearer of
  the face covering.
- COVID-19 symptoms, and the importance of obtaining a COVID-19 test and not coming to work
  if the employee has COVID-19 symptoms.

Appendix D: COVID-19 Training Roster will be used to document this training.

#### **Exclusion of COVID-19 Cases**

Where we have a COVID-19 case in our workplace, we will limit transmission by:

- Ensuring that COVID-19 cases are excluded from the workplace until our return-towork requirements are met.
- Excluding employees with COVID-19 exposure from the workplace for 14 days after the last known COVID-19 exposure to a COVID-19 case.
- Continuing and maintaining an employee's earnings (based on federal/state law), seniority, and all
  other employee rights and benefits whenever we've demonstrated that the COVID-19 exposure is
  work related. This will be accomplished by: JLPAA will follow the guidelines provided by federal and
  state law to determine how employees will be paid due to a COVID-19 case. Employees will be
  given the current information at the time of a case. Employees are allowed to use any sick time they
  may have in the event that the federal/state does not cover the sick time. JLPAA will partner with
  workers comp also to determine any other benefits at the time a case is presented.

• Providing employees at the time of exclusion with information on available benefits.

### Reporting, Recordkeeping, and Access

It is our policy to:

- Report information about COVID-19 cases at our workplace to the local health department whenever required by law, and provide any related information requested by the local health department.
- Report immediately to Cal/OSHA any COVID-19-related serious illnesses or death, as defined under CCR Title 8 section 330(h), of an employee occurring in our place of employment or in connection with any employment.
- Maintain records of the steps taken to implement our written COVID-19 Prevention Program in accordance with CCR Title 8 section 3203(b).
- Make our written COVID-19 Prevention Program available at the workplace to employees, authorized employee representatives, and to representatives of Cal/OSHA immediately upon request.
- Use the **Appendix C: Investigating COVID-19 Cases** form to keep a record of and track all COVID-19 cases. The information will be made available to employees, authorized employee representatives, or as otherwise required by law, with personal identifying information removed.

### **Return-to-Work Criteria**

•	COVID-19 cases with COVID-19 symptoms will not return to work until all the following have occurred:
	<ul> <li>At least 24 hours have passed since a fever of 100.4 or higher has resolved without the use of fever-reducing medications.</li> <li>COVID-19 symptoms have improved.</li> <li>At least 10 days have passed since COVID-19 symptoms first appeared.</li> </ul>
•	COVID-19 cases who tested positive but never developed COVID-19 symptoms will not return to work until a minimum of 10 days have passed since the date of specimen collection of their first positive COVID-19 test.
•	A negative COVID-19 test will not be required for an employee to return to work.
•	If an order to isolate or quarantine an employee is issued by a local or state health official, the

employee will not return to work until the period of isolation or quarantine is completed or the order is lifted. If no period was specified, then the period will be 10 days from the time the order to isolate

Tanya Taylor

was effective, or 14 days from the time the order to guarantine was effective.

### **Appendix A: Identification of COVID-19 Hazards**

All persons, regardless of symptoms or negative COVID-19 test results, will be considered potentially infectious. Particular attention will be paid to areas where people may congregate or come in contact with one another, regardless of whether employees are performing an assigned work task or not. For example: meetings, entrances, bathrooms, hallways, aisles, walkways, elevators, break or eating areas, cool-down areas, and waiting areas.

Evaluation of potential workplace exposure will be to all persons at the workplace or who may enter the workplace, including coworkers, employees of other entities, members of the public, customers or clients, and independent contractors. We will consider how employees and other persons enter, leave, and travel through the workplace, in addition to addressing fixed work locations.

## **Appendix C: Investigating COVID-19 Cases**

All personal identifying information of COVID-19 cases or symptoms will be kept confidential. All COVID-19 testing or related medical services provided by us will be provided in a manner that ensures the confidentiality of employees, with the exception of unredacted information on COVID-19 cases that will be provided immediately upon request to the local health department, CDPH, Cal/OSHA, the National Institute for Occupational Safety and Health (NIOSH), or as otherwise required by law.

All employees' medical records will also be kept confidential and not disclosed or reported without the employee's express written consent to any person within or outside the workplace, with the following exceptions: (1) Unredacted medical records provided to the local health department, CDPH, Cal/OSHA, NIOSH, or as otherwise required by law immediately upon request; and (2) Records that do not contain individually identifiable medical information or from which individually identifiable medical information has been removed.
